Skid Steer Heavy Duty

# Premier Series

The PS Series is uniquely designed for use with large frame, high h.p. skid steers.

Introducing the 6-foot PS600, 7-foot PS700 and 8-foot PS800. The PS Series utilizes the power and size of today's larger and more powerful skid steers.

## The Landscapers' Choice

### Specifications

**Mainframe:** 1/4" X 4" X 4" Structural steel frame  
**Bearings:** Triple seal rotor bearings  
**Brg.Housings:** Steel cut & replaceable  
**Gauge Wheels:** Flip-up, adjustable, removable, quick-tach  
**Rotors:** 2" Sabre tooth composite metal,  
1 1/4" carbide button (6' & 7'), 1 3/4" carbide aggressor  
**Special Rotor:** Construction rotor/flat bar  
**Drive:** Powerful 20 cu. in. motor  
**Drive Chain:** #80 Double roller chain and self-adjusting tensioner  
**Mount:** Universal skid steer mounting  
**Side Shields:** Standard equipment & adjustable (4-position)  
**Angle:** Choose either manual or hydraulic  
**Extender:** Gauge wheel positioning system, standard equipment  
**Materials Bar:** Standard equipment & adjustable

### What it does

PIRANHA is a piece of equipment to make landscaping quick and easy. The rotor turns in a counter rotating motion, putting rock and debris between the end shields while processing the dirt through the machine, leaving an excellently prepared seed bed. Operating the PIRANHA with the gauge wheels down puts the PIRANHA in the landscaping mode. Operating the PIRANHA with the gauge wheels in the up position puts the machine in the tilling mode. Flip up the end shields and angle the PIRANHA to windrow rock and debris either by manual or hydraulic turn. PIRANHA features a float or rigid center link control as standard equipment on tractor models. The float setting is used for consistent rotor to ground engagement and the rigid setting is used for grinding.

**PIRANHA** is a Trademark of Northern Technologies dba **NORTEC**

# The **NORTEC** Difference

## Industry Exclusive

3 Rotors to Choose from:  
 2" Sabre Tooth  
 1 3/4" Carbide AGGRESSOR  
 Flat Bar/Construction Rotor

Piranha offers 3 rotors to choose from: 2" Sabre tooth rotor, aggressor tooth carbide rotor (which is 50% more aggressive, takes 25% less power than our discontinued carbide button tooth), and the construction rotor which is excellent for laying down gravel or processing soil.

## Flip-Up Gauge Wheels Choose either tilling mode or landscaping mode.

NORTEC's industry-changing feature, used in the "down" position, provides even performance. Use in the "up" position for more aggressive action. Gain precious storage space on trailers, in sheds or warehouses by storing or transporting with gauge wheels in the "up" position.

## Adjustable and Removable Side Shields

Side shields can be adjusted to four different positions, or removed entirely for windrowing rock and debris. Spindles on top of the machine provide built-in storage.

## EZ Posi-Lock Material Bar Adjustment System 24 Adjustments

The new, stronger material bar is equipped with a positive locking system. This system adjusts quickly, easily and accurately - no tools required! Heavy-duty fabricated design for trouble-free operation. Material bar belting is made of high-quality multi-ply belting.

## EXTENDER Gauge Wheel Positioning System IN/OUT

A dual-position sliding gauge wheel tube allows you to choose the arm length best suited for maximum wheel protection in a variety of conditions.

## Choose Either Manual or Hydraulic Angle

5-position manual angle - Quick and easy (a low cost option).  
 Hydraulic angle - Just flip the cab-mounted switch to angle the rotor either left or right.

## Rugged Double #80 Drive Chain

33,440-lb. tensile strength is the heaviest in the industry, providing long lasting, dependable operation.

## Structural Steel Tube Frame

4"x 4"x 1/4" designed for higher hp. units.
