

Features

PIRANHA offers 3 rotors to choose from: 2" Sabre tooth rotor, 1 3/4" aggressor tooth carbide rotor (which is 50% more aggressive, takes 25% less power) and the construction/processing rotor (excellent for laying down gravel and small rock removal).

Flip-Up Gauge Wheels Choose either tilling mode or landscaping mode. NORTEC industry changing feature; Used in the "down" position, provides even performance. Use in the "up" position for more aggressive action. Gain precious storage space on trailers, in sheds or warehouses by storing or transporting with gauge wheels in the "up" position. The "up" position allows easier trailer loading.

Posi-Lock Wheel Adjusters Quick and easy. Simply move the spacer to the top or bottom position to achieve the proper setting.

Quick-Flip Side Shields Easy-Up/Easy Down. As simple as pulling a pin and flipping up the side shields. No need to remove and possibly lose the shields, just flip them up and windrow the rock and debris off to the side.

5- Position Manual Angle or Hydraulic Angle

Straight, left or right. Just flip up the side shields and windrow the rock and debris.

Rugged Chain Drive and Dry Chain Case

The Piranha features an environmentally friendly dry chain case. Experience clean, low maintenance operation with NO leaky oil. Easy to service, just remove the cover and, because there's no oil to contend with, you can do your inspection and you're back to work.

Flex & Float

Our unique float system is as easy as pinning the system in either the ridge or flex & float setting. Adjust for changing landscape conditions. Excellent for berms and rolling terrain.

Material Shield Ski/Shoe/Runner

The runner will help guide the shields up and over that problem area. Without the runner, the material shield could hook a root or ledge rock and possibly damage the side shield.

In an area where there's a possibility of puncturing a tire, just flip up the gauge wheels and operate on the runners. This is a great feature on track machines because the track is able to provide a level surface vs. a wheel-driven unit. In some cases, running on the runners is the preferred method of operation.

Optional:

NORTEC Exclusive

Piranha Uses

- Soil Conditioning
- Rock Removal
- Seedbed Preparation
- Pulverizing
- Landscaping
- Setting Grade
- Trenching
- Backfilling
- Leveling
- Grading
