 PTX700 7-foot, Tractor

25hp to 35hp
 Small-Frame & Mid-Frame Tractor

The TX Series is uniquely designed for use with 25-35hp compact tractors. Introducing the 5-foot PTX500, 6-foot PTX600 & 7-foot PTX700. The TX Series offers the performance, durability and compatibility needed for 25-35hp compact tractors.

INDUSTRY EXCLUSIVE

Quick Change Rotor and 3 Rotors to choose from.
 2" Sabre Tooth, 1 3/4" Carbide Aggressor, Flat Bar/Processing Rotor

Specifications

Mainframe: 1/4" X 3" X 3" Structural Steel Frame
 Gauge Wheels: Flip-up, Adjustable, Removable
 Drive: 540 RPM PTO
 Drive Chain: #80 Single Roller Chain and Self-Adjusting Tensioner
 Mount: Cat 1 3-Point Hitch
 Side Shields: Quick-flip, Standard Equipment
 Angle: Left, Right and Straight, Standard Equipment
 Angle: Manual Angle or Hydraulic Angle
 Materials Bar: Adjustable, Standard Equipment
 Protection: Slip Clutch or Shear Pin
 Rotor Bearings: Triple Seal Rotor Bearing
 Rotor Brg.Housing: Steel Cut & Replaceable
 Rotors: Sabre Composite Metal Tooth
 Aggressor Carbide Tooth
 Special Rotor: Processing or Rotary Broom

Operate in Landscaping Mode: **Yes**
 Operate in Tilling Mode: **Yes**
 Greaseable Rotor Bearings: **Yes**
 Quick-Tach Rotors: **Yes**
 Adjustable Hitch Pins In/Out: **Yes**
 Ridge or Float Center Link: **Yes**
 Material Bar Safety Slider: **Yes**
 High Folation Rear Tires: **Yes**

Option's
 Material Side Shield Ski/Shoe **Yes**

What it does

PIRANHHA is a piece of equipment that makes landscaping quick and easy. The rotor turns in a counter-rotating motion, putting rock and debris between the end shields while processing the dirt through the machine, leaving an excellently prepared seed bed. Operating the PIRANHHA with the gauge wheels down puts the PIRANHHA in the landscaping mode. Operating the PIRANHHA with the gauge wheels in the "up" position puts the machine in the tilling mode. Flip up the end shields and angle the PIRANHHA to windrow rock and debris either by manual or hydraulic turn.
