PXS305 Standard 3-foot

PXS405 Standard 4-foot

Small and Mid-Size Compact/Mini Skid steer

10-Series

PXS410 Premier 4-foot

PXS510 Premier 5-foot

PXS610 Premier 6-foot

Mid and Large-Size Compact/Mini Skid steer

The PXS Series is uniquely designed for use with the compact/mini skid steers. NORTEC offers two series, standard and premier. Pick the series that's right for you. The standard series offers straight-forward features to get the job done. The premier series is a feature-packed unit designed and engineered to utilize the power and size of today's larger and more powerful units.

INDUSTRY EXCLUSIVE

Quick Change Rotors and 3 Rotors to choose from.
2" Sabre Tooth, 1 3/4" Carbide Aggressor, Processing Rotor

Quick-Flip Material Side Shields.....	Yes	Yes	Yes	Yes	Yes
Hydraulic Drive.....	Yes	Yes	Yes	Yes	Yes

What it does

PIRANHA is a piece of equipment that makes landscaping quick and easy. The rotor turns in a counter-rotating motion, putting rock and debris between the end shields while processing the dirt through the machine, leaving an excellently prepared seed bed. Operating the PIRANHA with the gauge wheels down puts the PIRANHA in the landscaping mode. Operating the PIRANHA with the gauge wheels in the "up" position puts the machine in the tilling mode. Flip up the end shields and angle the PIRANHA to windrow rock and debris either by manual or hydraulic turn.
