

Move Snow FAST!

The newly redesigned Sno-Tec is a revolutionary way to move large volumes of snow quickly. The Sno-Tec utilizes a steel moldboard to push the snow causing it to roll in front of the unit. This design moves a tremendous amount of snow each pass. Side plates minimize spill-over, making a clean sweep.

NORTEC

- Reduces Windrows
- Reduces Spillage
- Reduces Time
- Reduces Labor
- Reduces Maintenance

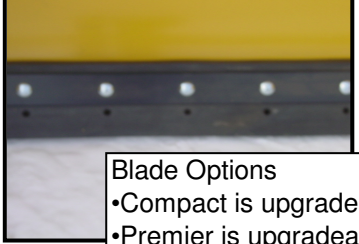

Move Snow
 •faster •easier
 •cleaner •cheaper

Mounting Options
 •Various Loader Mounts
 •Universal Skid Steer Mount
 •Three-Point Tractor Mount
 All mounts are interchangeable. Select one or more that fits your application.

Skid Shoes
 •Placement allows for excellent side visibility
 •Provides "float" for the unit reducing property damage
 •Angled design to ride over obstacles
 •Minimum side extension for better trimming

Blade Options
 •Compact is upgradeable to AR steel or rubber blade kit
 •Premier is upgradeable to rubber blade kit

10" Extension Plate
 •Economical way to increase pusher capacity 33%!
 •Use in up position for volume
 •Use in down position for greater visibility
 •Tilts up or down with the simple pull of a pin
