

The **BAGRR™** Loading System

The most efficient method available to load loose materials into flexible bags!

The **BAGRR™** is a simple device designed to make the back breaking job of filling bags easy, quick and efficient. Bags can be filled and delivered in as little as 30 seconds*, even in the most difficult operating conditions.

The **BAGRR™** loading system is available in many models, for use with a wide variety of machines, including:

- Compact utility loaders,
- Standard skid steer loaders,
- Wheel loaders,
- Agricultural tractors,
- Mini-excavators

**Manufacturer's and Distributor's of
Unique Heavy Equipment Attachments**

The **BAGRR™** Loading System

The most efficient method available to load flowable materials into flexible bags!

The user installs the empty bags onto the back end of the **BAGRR™** loading tubes.

Drive into the pile of loose material, such as sand, filling the **BAGRR™** loading tubes.

Rotating the **BAGRR™** upwards causes the material in the loading tubes to fill the bags.

The bags fall off the **BAGRR™** ready to be tied closed and put to use. Average loading time is approximately 30 seconds*.

Increase Your Profits!

Use the **BAGRR™** Loading System to efficiently load almost any stock piled product, on demand, into customer friendly packaging. Products like Sand, Mulch, Fertilizer, Rock Salt, Wood Chips, or Decorative Stone can be loaded into bags as the customer waits, saving you the cost of prepackaged inventory products.

Send us photos of your **BAGRR™** in use to be eligible for Riden's quarterly award for the most unique **BAGRR™** use.

*Loading times are stated after all bags have been installed and will vary with the level of operator experience.
