

By NORTEC **PRICE FIGHTER Series II Soil Processor**

Skid Steer Model PFS600 Series II

Tractor Model PFT500, PFT600 Series II

Introducing the Price Fighter line of Piranha soil processor/landscape rakes! An affordable alternative for homeowners and entry level landscapers & for entry level rental market. Don't need all the bells and whistles offered on our deluxe full-featured Piranhas? This basic Piranha is cost effective, yet designed and built with quality components. The rotor for example, no cost cutting here. The Price Fighter line features the same rotor as Nortec's premier line of soil processors. In fact, the Price Fighter has features our competitors don't offer, even though they cost hundreds and thousands of dollars more. Features like flip-up gauge wheels, replaceable bearing housings and quick-flip material side shields, just to name a few.

PFT Series - Designed for Tractors Under 30hp 540 rpm PTO, Cat 1 Hitch

PFS Series - Designed for skid steers with under 18gpm @ 3000 PSI
Operating weight of under 1500 lbs.

Material Shield Ski/Shoe/Runner

Flip Up Gauge Wheels Standard Equipment

Gain storage space both in your garage and on your transport trailer with flip-up rear gauge wheels. When landscaping, you get the added benefit of a tighter working area, putting the rotor in the ground sooner than with the gauge wheel attached.

Specifications

Mainframe:	3" X 3" X 1/4" Structural steel frame - PFT500, PFT600 3" X 4" X 1/4" Structural steel frame - PFS600
Bearings:	Triple seal rotor bearings (Replaceable)
Gauge Wheels:	Flip-up, adjustable, removable, quick-tach
Rotors:	2" Sabre tooth, 1 3/4" carbide aggressor
Special Rotor:	Construction rotor/flat bar
Drive:	PTO Drive - PFT500, PFT600 Hydraulic Drive - PFS600
Drive Chain:	#80 single roller chain and self-adjusting tensioner
Mount:	Cat. I 3-Point Hitch - PFT500, PFT600 Universal Skid Steer - PFS600
Side Shields:	Standard equipment (Quick-flip)
Angle:	3-Position adjustable hitch - PFT500, PFT600 Fixed-position - PFS600
Materials Bar:	Standard equipment (Adjustable)
Optional Equipment:	Material Ski/Shoe/Runner

PIRANHA is a piece of equipment to make landscaping quick and easy. The rotor turns in a counter rotating motion, putting rock and debris between the end shields while processing the dirt through the machine, leaving an excellently prepared seed bed. Operating the PIRANHA with the gauge wheels down puts the PIRANHA in the landscaping mode. Operating the PIRANHA with the gauge wheels in the up position puts the machine in the tilling mode. Flip up the end shields and angle the PIRANHA to windrow rock and debris either by manual or hydraulic turn. PIRANHA features a float or rigid center link control as standard equipment on tractor models. The float setting is used for consistent rotor to ground engagement and the rigid setting is used for grinding.
